

Figure (1): Sit Kusa overview map

- If BSU affiliate QGIS file and needed data are found on data drive with in the GIS folder
- If not a BSU affiliate reach out to me for data and necessary files

Figure (2): Temporal coverage of GPS stations

- Created in: *temporal_Cov_Fig.m*

Figure (3): Rock10 frequency domain filtering

- Created in: *plots_for_thesis.m*
- Code section: Rock10 Easting Frequencies Pre And Post Filtering And Sample Corner Frequencies Of Rock10

Figure (4): Ice15-2208 corner frequency examples

- Created in: *plots_for_thesis.m*
- Code section: Ice15-2208 Filtered @ Different Corner Frequencies

Figure (5): Ice12-2008 detrend example

- Created in: *plots_for_thesis.m*
- Code section: Detrend Example Of Ice12-2008

Figure (6): Yakutat precip compared to model rain

- Created in: *plots_for_thesis.m*
- Code section: Yakutat Rain Data To EBFM Rain Data

Figure (7): STA/LTA speed anomaly identification

- Created in: *speed_up_event_detection.m*
- NOTES: All of the legend items for this figure were created outside of matlab in powerpoint

Table (1): GPS record speed statistics

- Created in: *plots_for_thesis.m*
- Code section: GPS record statistics
- NOTES: This script does not create a table but creates a matlab struct with all the necessary data

Figure (8): Surge and quiescent overlapping pairs

- Created in: *plots_for_thesis.m*
- Code section: Speed Times-Series Of Surge Pair and Quiescent Pair

Figure (9): Ice11-2208 speed up events with rain time series

- Created in: *plots_for_thesis.m*
- Code section: Figure: Ice11-2208 with speed-ups and rain

Figure (10): Surge and quiescent speed profiles

- Created in: *speed_profile_extract.m*

Figure (10): Surge and quiescent rain accumulation profiles

- Created in: *rain_accumulation_profiles.m*

Table (2): Displacement statistics

- Created in: *displacement_calculator.m*
- NOTES: This script does not create a table but creates a matlab struct with all the necessary data

Figure (S1): Ice12-2008 advection assessment

- Created in: *advection.m*

Figure (S2): Speed up variable scatter plots

- Created in: *fit_scatter_plots.m*

Figure (S3): Correlation heat map

- Created in: *corr_heat_map.m*
